

FEEDBACK on VAL RESIA and BIODIVERSITY PROJECT 2016

- 1) What was your impression of the day (6th April 2016)? **Mention the positive points related to the VISIT to the Prealpi Giulie Natural Park.** Consult the park site (www.parcoprealpigiulie.it) if it may help you answer this question better. Why are the protected Alpine areas important both for visitors like you and for the local population? What do you think of the visitors' centre? Which site of the Nature Park impressed you most and why? Which senses did you use to discover the beautiful spots of the park? What did you appreciate of this ecosystem? Which animals, birds, insects, plants and flowers did you recognize?
- 2) Comment upon the quality of your interaction with the participants from Slovenia and Austria. Can you measure your effort in establishing a new relationship? How willing were you to socialise? IF NOT WHY? What impeded you from making the most of this opportunity? Please first blame yourself and become aware of what were your inner restraints. IF YES, How much did you talk? What did you talk about? Did you use the prepared questions? What kind of information did you get about your foreign partner yesterday? How satisfied are you of your performance?
- 3) **The Beauty of Diversity** was the banner of this year's project " Biodiversity: the importance of being different". The theme was **Preservation of Local Traditions** which meant the visit of the Natural Science Museum of Trieste, the visit to the Carsic house and the day in the ecomuseum of Val Resia. **Moments of Being** is the collection of your shared products: individual drawings of the experience in Carso and a selfie with partner and nature in Val Resia. What do you think of the slogan, the theme and the product of this year's project? What was your personal involvement in the project? How satisfied are you with your products? Why did you choose those images as symbols of your interpretation of "Biodiversity: the Importance of Being different." What is the ultimate meaning of this international project according to you?
